SUPPLEMENTAL DECLARATION OF  
DAVID S. BROWN

(FILED UNDER SEAL)

**SUPPLEMENTAL DECLARATION OF DAVID S. BROWN**

I, David S. Brown, declare, pursuant to 28 U.S.C. § 1746, as follows:

1. I am an attorney admitted to practice law by the State Bar of California. I am employed by the U.S. Securities and Exchange Commission (the “Commission”) as a staff attorney in the Division of Enforcement in the Los Angeles Regional Office in Los Angeles. I make this supplemental declaration in support of the Commission’s *Ex Parte* Application For Temporary Restraining Order and Orders: (1) Freezing Assets; (2) For Accountings; (3) Prohibiting the Destruction or Alteration of Documents; (4) Expediting Discovery; (5) Appointing a Temporary Receiver; and Order To Show Cause Why A Preliminary Injunction Should Not Be Granted and Appointment of a Permanent Receiver. I have personal knowledge of each of the matters set forth below based on the files and records the Commission has obtained, and, if called as a witness, I could and would competently testify to the facts stated herein.

2. Attached hereto as Exhibit 73 is a true and correct copy of excerpts of “TBIS Weekly: GitHub, Consensus 2018, and a Mystery Logo” published on steemit.com on or about April 20, 2018, which I downloaded and printed on May 21, 2018.

3. An officer of the Commission acting pursuant to the Formal Order issued a subpoena duces tecum to U.S. Bank for copies of, among other things, records showing recent transactions in the account held in the name of TBIS. U.S. Bank responded to the subpoena and produced monthly statements for April 2018 and outward payment reports, along with an affidavit from its custodian of records, true and correct copies of excerpts of which are attached hereto as Exhibit 74.

4. Attached hereto as Exhibit 75 are true and correct copies of photographs of the EHI website that I took and printed on May 21, 2018.

## Community Voice

**Q:** When will github information be released?

**A:** TBIS loves open source projects and fully supports them. We will be working open sourcing much of what we build as time goes on and allows us to. Titanium is alike other companies, such as Netflix and AirBnB, as they do not give out all of what they build, but the snippets they do release are extremely cool and highly useful.

*-Edward Wilson, Backend Engineer.*

EXHIBIT 73 PAGE 7

**Q:** How do you pick your partnerships (for instance, other crypto projects) and what advantages do they bring to the Titanium team?

**A:** All future partnerships are based on merit and project interest. We are always on the lookout for (trending/cryptocurrency) (github/signpost/steemit.com) and ideals. TBIS has a couple of strategic partnerships coming up that we will be announcing soon!

*- Richard Silver, COO.*

**Q:** After the fork, what is the total supply of TBAR? What happened to the other TBAR?

**A:** TBAR total supply is 60 million with a current circulating supply of 43,222,415 million .

*-Monte Cristo, Community Manager*

**Q:** It has been previously mentioned that masternodes will be implemented into the TBIS Blockchain. Is this still a go and will there be tiered functionality? Furthermore, how will these masternodes play into supporting the IaaS and PaaS that Titanium will be offering?

**A:** Masternodes are still a go - they are planned to be tiered, but we are still developing the blockchain and the wallet - the masternodes depend on both of those. We do not have values yet, as we are still working out the masternode functionality.

Currently masternodes are planned for ledger maintenance. I do not see much functionality if any for MNs in IaaS or PaaS, but since we are still in development of all of those components, something could come up for MNs in that realm.
